

BE READY FOR WHAT'S NEXT

MODERNIZATION ASSESSMENTS

WHO:

Businesses run on software. Many internal systems developed specifically for organizations over the years require updating and re-platforming to adapt to modern devices, processes and changing requirements. Kopis provides assessments of these systems as a first step in determining the best path to modernize. The Modernization Assessment has the greatest impact on self-monitored applications or software, offering an outside review of the quality, extensibility and viability of your application, ensuring it meets user expectations.

WHAT:

Our experience has shown that the user experience is key to successful corporate growth. Our team of Senior Architects and Business Analysts are experts in assessing, evaluating and providing approaches to bring impact through modernization. The following Assessment types focus on specific needs and follow industry best practices.

1

OPTION

SOFTWARE PRODUCT ARCHITECTURE ASSESSMENT

Kopis will conduct an Architectural Review of the product including areas such as Services, Security, Communication, Data Layers, Caching, Infrastructure, Integration and Performance.

2

OPTION

CLOUD MIGRATION ASSESSMENT

Many organizations are interested in leveraging cloud options to reduce their on-premises footprint, management, power, and infrastructure costs. In this assessment, Kopis' Cloud practice will assess the applications utilized for viability in migrating or developing applications to reside in the cloud.

OPTION

3

MOBILE APPLICATION ASSESSMENT

Whether you are running Android, iOS, or Windows, Kopis can simplify your processes to the core. In this assessment, our mobile development team evaluates ways to create new connections with your customers and partners by delivering important info and driving sales on the fly. When you empower users on the go, you can do business anywhere.

OPTION

4

APPLICATION ARCHITECTURE ASSESSMENT AND CODE REVIEW

Kopis resources will conduct an Architectural Review and Code Review of the specified application(s). Kopis will perform this review using standard industry guidelines and best practices. Areas of focus will be on application performance, availability, reliability, scalability, security, maintainability, accessibility, deployment and extensibility. Performing an outside third party review of the application with fresh perspective will validate the architectural model, integrity and maintainability.

OPTION

5

DATA AND ANALYTICS ASSESSMENT

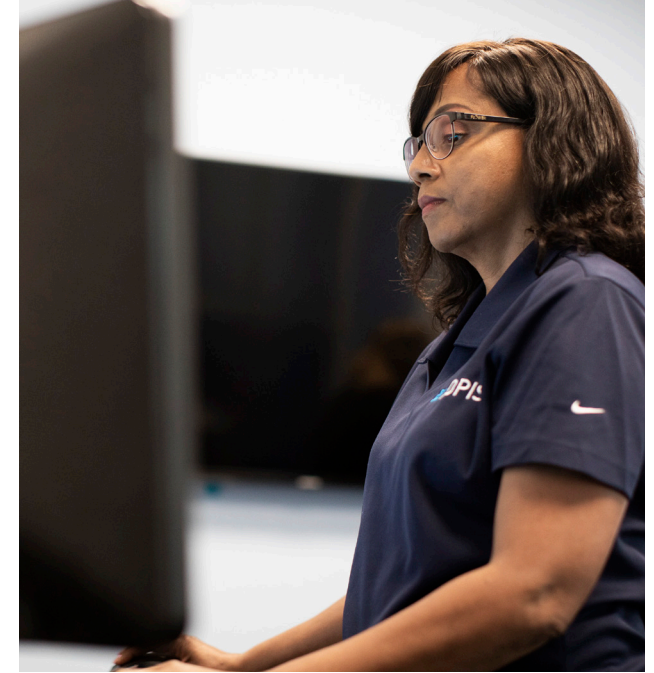

This assessment utilizes our BI Practice to evaluate your current data platform and its ability to provide quantifiable answers to your most troublesome business questions.

Assessment

Our team will evaluate your data platform, assess your organizational data maturity, and develop an approach to meet your short and long-term needs

Follow-On Offering

In addition to the Data and Analytics Assessment, we work with your business SMEs to develop 3 data visualizations that answer your most relevant questions. The focus of the Jumpstart is to allow your users to start acting on the information in front of them. Our team can help you organize your information and create stunning data visualizations, making your data easily understandable and helping you turn insights into impacts.

DELIVERABLE:

Kopis will deliver a document that will outline the approach taken, areas of the application reviewed, findings and recommendations for these areas, areas of concern, mitigations recommended, and any recommended next steps. In addition we will deliver any specific scenario deliverable outlined in the assessment descriptions.
